Profile

Third-year Networking and IT Security student who has published a Chrome extension and built practical networking and security projects. Interested in 2027 internship and co-op opportunities across cybersecurity, infrastructure, technical support, and solutions engineering.

Education

Ontario Tech University

Oshawa, ON

Bachelor of Information Technology (Honours) - Networking and IT Security

Sept. 2024 - Expected Apr. 2028

- Relevant coursework: Advanced Networking I, Cryptography and Network Security, Introduction to Cloud Services, Programming with Python, and Computer Systems.

Projects

OTNow Canvas Companion | *Chrome Manifest V3, JavaScript, Canvas APIs*

[GitHub](#) | [Web Store](#)

- Designed and published a local-first Chrome extension that groups Canvas deadlines, detects moved dates, schedules reminders, links course resources, caches data for offline viewing, and supports light and dark modes.
- Integrated two allowlisted read-only Canvas endpoints while keeping coursework in Chrome storage; its opt-in dashboard has recorded 380 dated items across 8 consenting reporting installations.

Cisco Networking Labs | *Cisco IOS, Packet Tracer, Wireshark*

- Built and verified routed and switched Cisco topologies using IPv4/IPv6 addressing, VLANs, access ports, 802.1Q trunks, inter-VLAN routing, DHCP, STP, NAT, and OSPF/EIGRP fundamentals.
- Diagnosed connectivity and routing faults with IOS show commands, interface state, routing tables, ping, traceroute, and packet captures; validated end-to-end reachability after each configuration change.

Secure File Transfer | *Python, TLS, SHA-256, FastAPI*

[Case Study](#)

- Built an authenticated TLS client/server and local browser workspace for certificate setup, account management, resumable uploads, recipient inboxes, and verified downloads.
- Added recipient-scoped storage, SHA-256 verification, quarantine, throttling, and audit logs; completed eight upload/download round trips totalling 13.6 MB and resumed an interrupted 2 MiB upload from its recorded offset.

P2P Messaging (Collaborative WIP) | *Python, FastAPI, TCP/IP, ChaCha20-Poly1305*

[GitHub](#) | [Case Study](#)

- Co-developing an educational encrypted messaging prototype with a local browser workspace, password-protected device identities, signed peer cards, fingerprint verification, and authenticated direct messages.
- Added encrypted acknowledgements and local history, persistent replay rejection, bounded TCP frames, rate limits, timeouts, and signed attachment-digest references; documented the protocol and current threat-model limitations.

Technical Skills

Programming and Web: Python, JavaScript, TypeScript, HTML/CSS, FastAPI, JSON, REST APIs

Networking: IPv4/IPv6, subnetting, VLANs, 802.1Q, inter-VLAN routing, DHCP, DNS, NAT, STP, OSPF/EIGRP fundamentals, routing and switching troubleshooting

Security: TLS, SHA-256, file-integrity monitoring, access control, audit logging, input validation, threat modelling

Systems and Tools: Linux, Windows Server, Cisco IOS, Wireshark, Packet Tracer, Git, GitHub, Chrome extensions, Canvas APIs, Cloudflare Pages

Experience and Leadership

Co-Founder and Platform Developer

May 2026 - Present

SSIK IT Consulting & Solutions - Student-Led Initiative

Ontario, Canada

- Co-founded a student-led IT and cybersecurity initiative; define service scopes, privacy research, security-control review methods, and stakeholder-ready recommendations with one partner.
- Built a private internal application to track organizations, evidence, findings, and review states with workspace access controls, outbound-request safeguards, audit logging, and verified backups.

Technical Operations and Hosting

2026 - Present

Archtech - Developing Nonprofit

Oshawa, ON

- Set up Google Workspace and maintain website hosting and deployment for an unreleased nonprofit platform.
- Manage contributor access through a private repository and communicate hosting, permissions, and deployment requirements to the project team.

Sales Associate

May 2025 - Present

Winners

Oshawa, ON

- Process customer transactions, answer product questions, and resolve issues in a fast-paced retail environment.
- Coordinate restocking and floor organization with team members while balancing competing priorities.
